RE: Hartsville, TN - Nuclear Uranium Enrichment Facility

Dear Mr. Lesar:

In today's Tennessean Newspaper, they referred to you for anyone with comments regarding the above facility.

I am against this facility being put in Hartsville Tennessee. I live about 50 miles away from this pending site, in another county.

Those directly involved are just addressing the immediate community in Trousdale County. Other counties and cities are not having any input from what I can see. I feel like I am not the only one in this area who does not want the facility to be put there. However, there has not been any chance that I can tell, for surrounding areas and/or counties, to have any comment or be informed on any of the details of having the plant constructed there.

Alabama has a site this company is interested in, besides the Tennessee site. I feel like they should go to Alabama.

Any comments or information on this subject is appreciated. Thank you for your time and attention to this matter. I look forward to hearing from you.

With My Kindest Regard;

Marie Bodafor
